4 MAIN PARTS

Texpo® system provides a solid frame and high-quality booth with just 4 main parts.

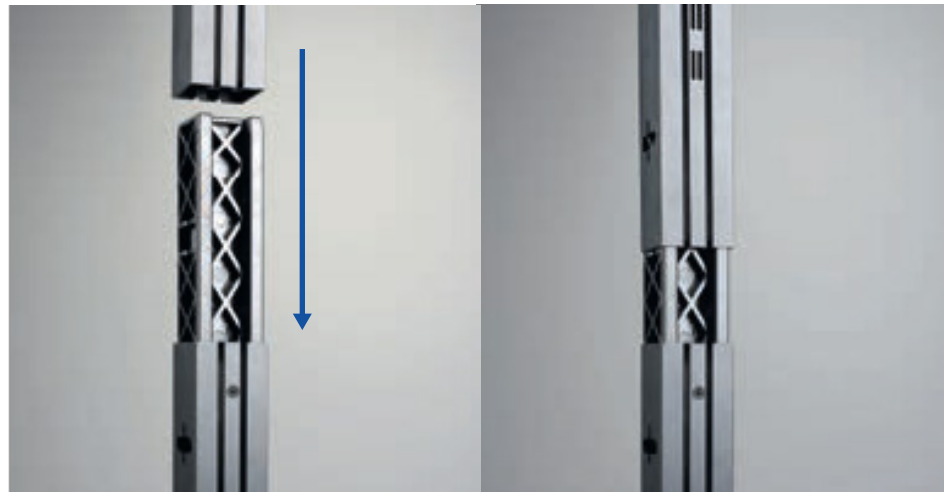

Slide and Lock

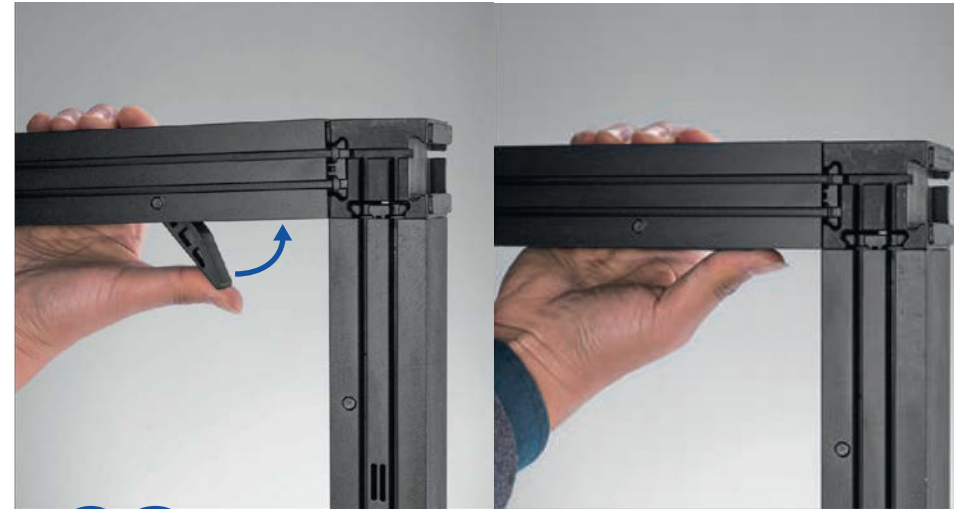

01

Insert

Texpo® fast-lock system enables tool-less assembly and guarantees robust connections

02

Lock

Push and click

Vertical poles - Top & bottom

Insert - Build upwards with ease. Simply insert the top pole into the bottom one to create a seamless vertical structure, ready for the next step.

Sizes: 50cm x 2 - 100cm x 2 - 100cm x 1

Horizontal bar

Slide and Lock - Frame your space in seconds. The horizontal bars slide effortlessly onto the vertical poles, locking securely in place without the need for screws or tools.

Sizes: 25cm - 28cm - 40cm

Brace rod

Push and Click - Add instant rigidity. The Brace Rod centers the frame, snapping into position with an intuitive click mechanism to ensure a rock-solid, stable display.

Size: 40cm

Access-

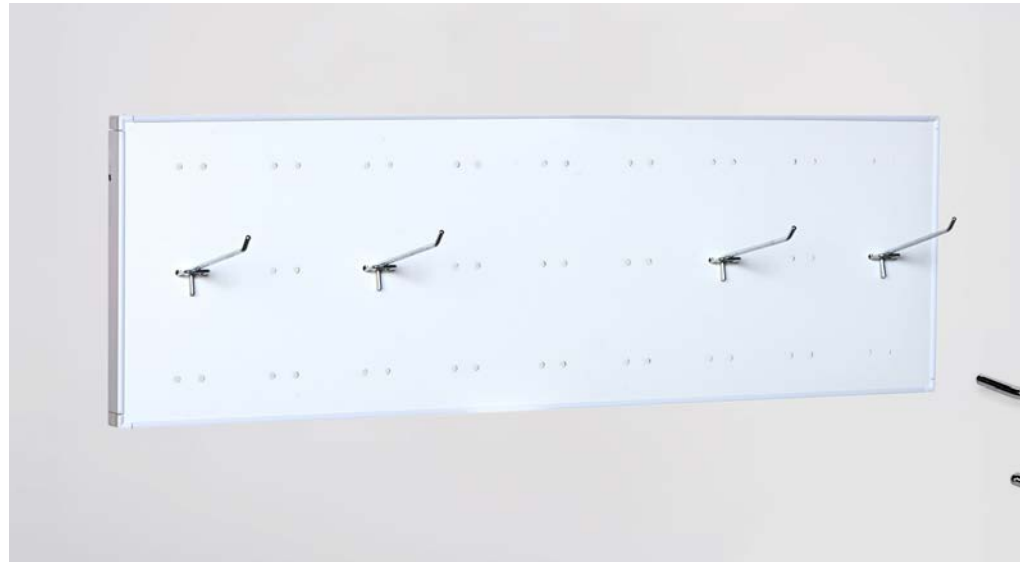

Bring your exhibit to life with **Texpo®** Accessories. These essential components transform your frame into a fully functional workspace. From stabilizing feet to smart connectors and shelving, every part attaches seamlessly to the Booth Body. Customize your layout instantly and secure your setup without a single tool.

Display Panel

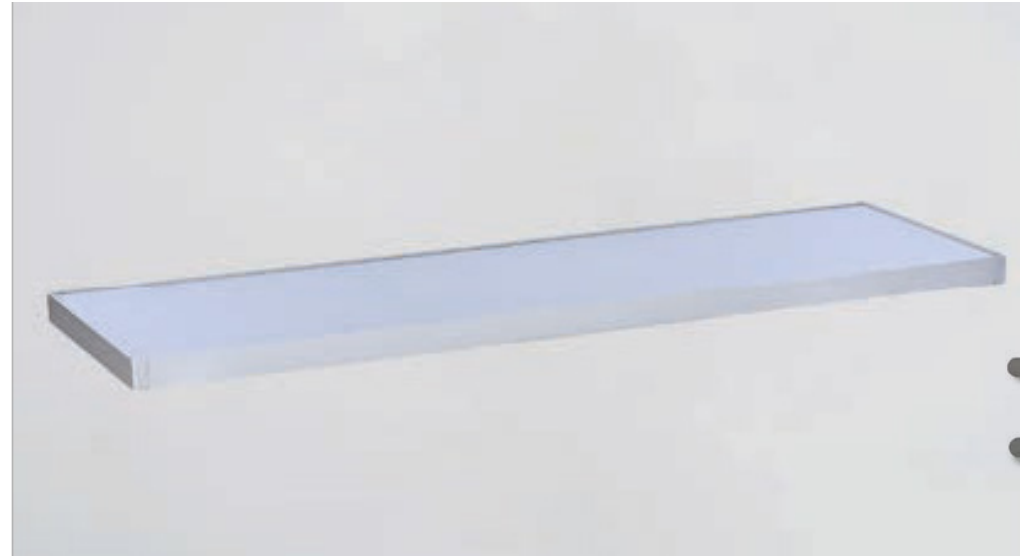

Make your merchandise the star. This panel attaches instantly to the frame, creating a clean, professional backdrop for your products. Simply insert the Hook for Display to hang items securely in seconds—creating an organized, impactful showcase without any tools.

Hook for Display

Shelf

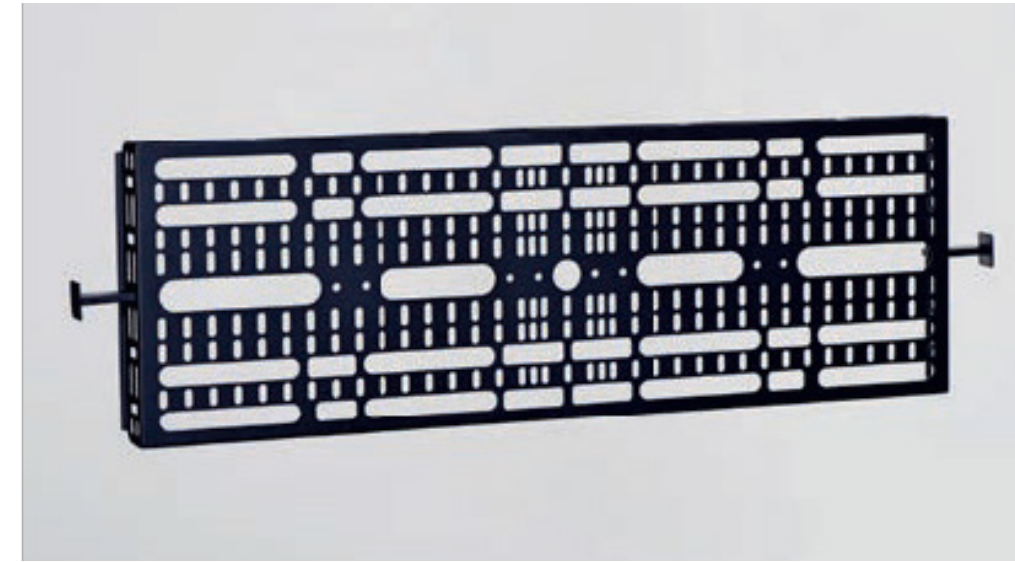

Add functional surface area in a snap. Perfect for brochures or product demos, this durable shelf creates immediate display space. It mounts using the intuitive Shelf Holder, which locks firmly onto the vertical poles to ensure a level, reliable support for your items.

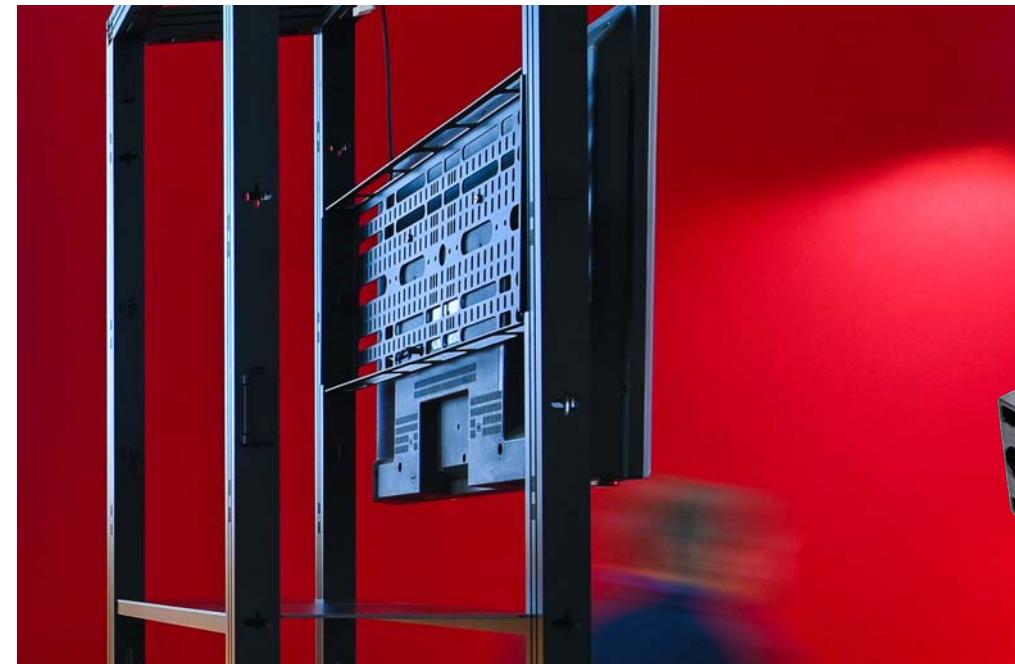

Shelf Holder

Monitor Bracket

Bring your booth to life with digital content. This heavy-duty Monitor Bracket integrates screens seamlessly into your **Texpo®** structure. Engineered for stability, it allows you to mount screens at the perfect eye level, ensuring your presentations and videos capture attention from every angle of the exhibition hall. Designed to support various screen sizes, it turns your booth into a dynamic media hub, helping you communicate your message effectively while maintaining a clean, professional look.

Secure your tech instantly. The Monitor Bracket Connector anchors your screen to the frame. It slides into the slots for a tight, wobble-free fit, ensuring your hardware stays safe and stable throughout the event.

Monitor Bracket Connector

Foot Full Secure freestanding walls instantly with this low-profile, tool-less base.

Foot Half

01 Put in

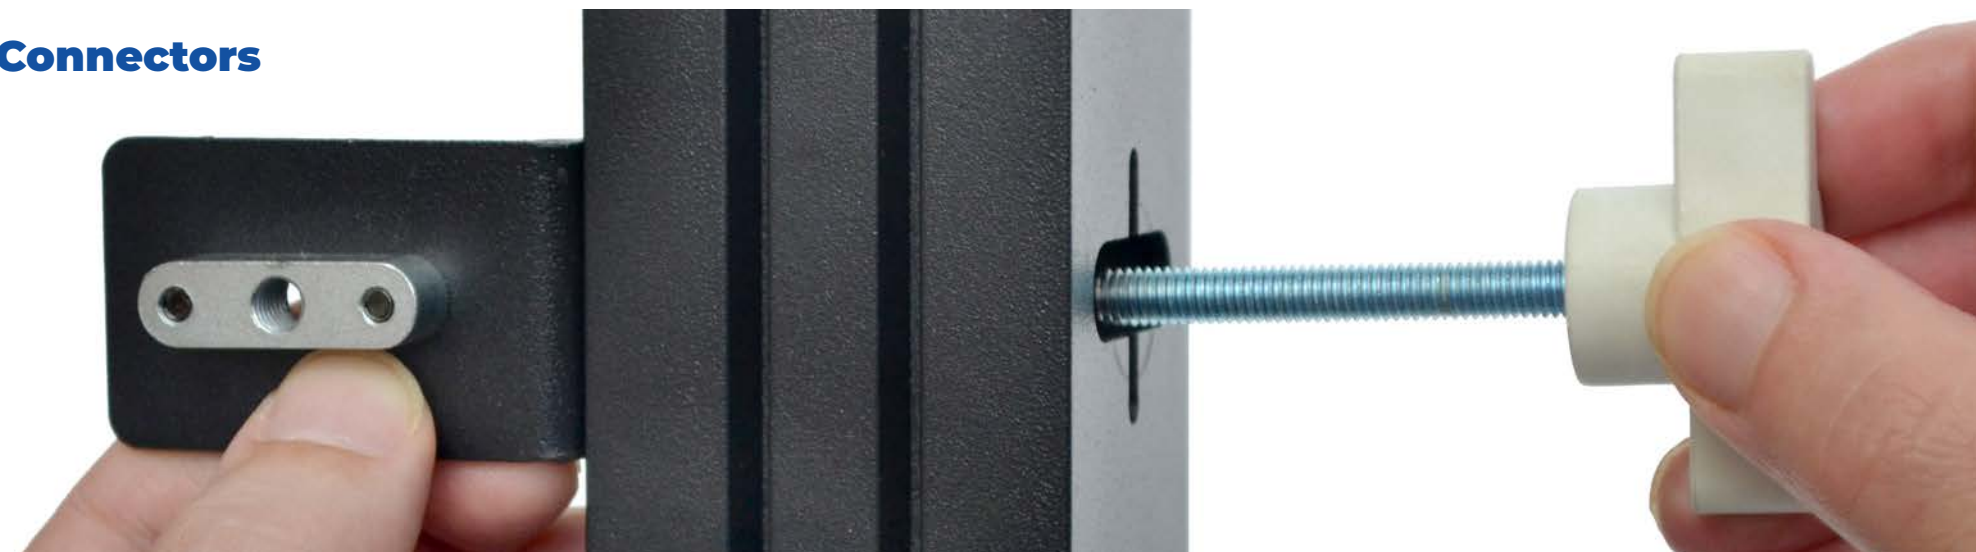

02 Lock

Both foot styles are crafted from durable, powder-coated steel with a scratch-resistant finish.

True to our tool-less philosophy, assembly is effortless: simply position the frame over the connector (as shown in step 01) and secure it using the butterfly screw (step 02). No screwdrivers or keys are required, ensuring a fast and frustration-free setup every time.

Connectors

Lighting

Texpo® lighting solutions are designed to enhance your booth's presence and guide attention exactly where it matters. From creating an inviting atmosphere to highlighting products and branding, the lighting system integrates seamlessly into the booth structure, delivering balanced illumination, visual depth, and a polished, professional look across the entire space.

LED Toplight

Highlight your graphics with this powerful LED light. Featuring a tool-free clip holder, it attaches instantly to panel tops, delivering bright, focused illumination to ensure your brand stands out.

Clip lamp holder

Bridge Downlight

Seamlessly integrate overhead lighting with this flush-mount LED downlight. Designed for booth cross-beams, it offers clean, bright illumination for your interior space with simple plug-and-play wiring for a tidy setup.

Shelf Downlight

Elevate your product presentation with this integrated shelf lighting solution. Designed to mount discreetly beneath the shelf profile, it casts a crisp, uniform glow directly onto your merchandise, adding depth to your display and ensuring your items stand out.

Installation is completely tool-free and intuitive. The lighting element integrates seamlessly into the shelf structure with a simple plug-and-play connection on the side. This smart design keeps wiring hidden from view, allowing you to create a professional, illuminated retail setup in minutes.

System Backlit

Transform your display into a radiant focal point with this premium LED curtain. The flexible ladder-style lights clip effortlessly onto the frame structure tool-free. This smart solution guarantees bright, shadow-free coverage across the entire surface, bringing your fabric graphics to life and ensuring your brand captures attention.

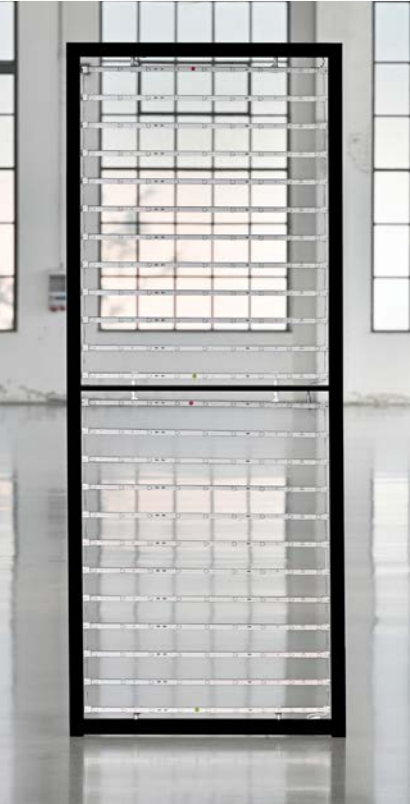

The new **Texpo®** backlit system is 100% compatible with the regular **Texpo®** frames

Trans- portation

Forget expensive logistics and shipping crates. The entire **Texpo®** exhibition system is designed with portability in mind. Every component comes with its own durable, custom-fitted carry bag, allowing the complete booth to pack down compactly. Whether you are driving a station wagon or a standard sedan, you can easily transport your entire setup yourself—saving you time, stress, and transport costs.

Effortless Mobility

Save your energy for the show. Integrated, heavy-duty wheels allow you to roll your equipment smoothly from the parking lot to the exhibition floor. The reinforced base handles the weight, so you don't have to carry heavy loads.

Additionally, our bags feature custom internal dividers that hold every connector and profile securely in place. This smart organization prevents scratching during transit and makes packing up faster by ensuring every part has a specific home.

Booth Examples

Discover what's possible with **Texpo®**. Our booth examples showcase how each system can be configured to create clean, professional exhibition spaces for different needs. From compact setups to larger layouts, every design is built using the same modular components—making it easy to adapt, expand, and reuse your booth across multiple events while maintaining a consistent, high-quality presence.

4 MAIN SHAPES

-  straight stand *Linear format for straightforward product presentation.*
-  X shape stand *Cross-frame structure for balanced support.*
-  U shape stand *Three-sided structure with one open side for front access.*
-  L shape stand *Right-angle structure for structured product presentation.*

straight
stand

Designed around a simple straight layout, this booth combines a strong vertical element with a clean back wall to create a clear and organized presentation space. The open front allows easy access, while the overhead section adds structure and visibility. Built with modular components, it ensures a balanced setup that is both functional and easy to adapt.

straight
stand

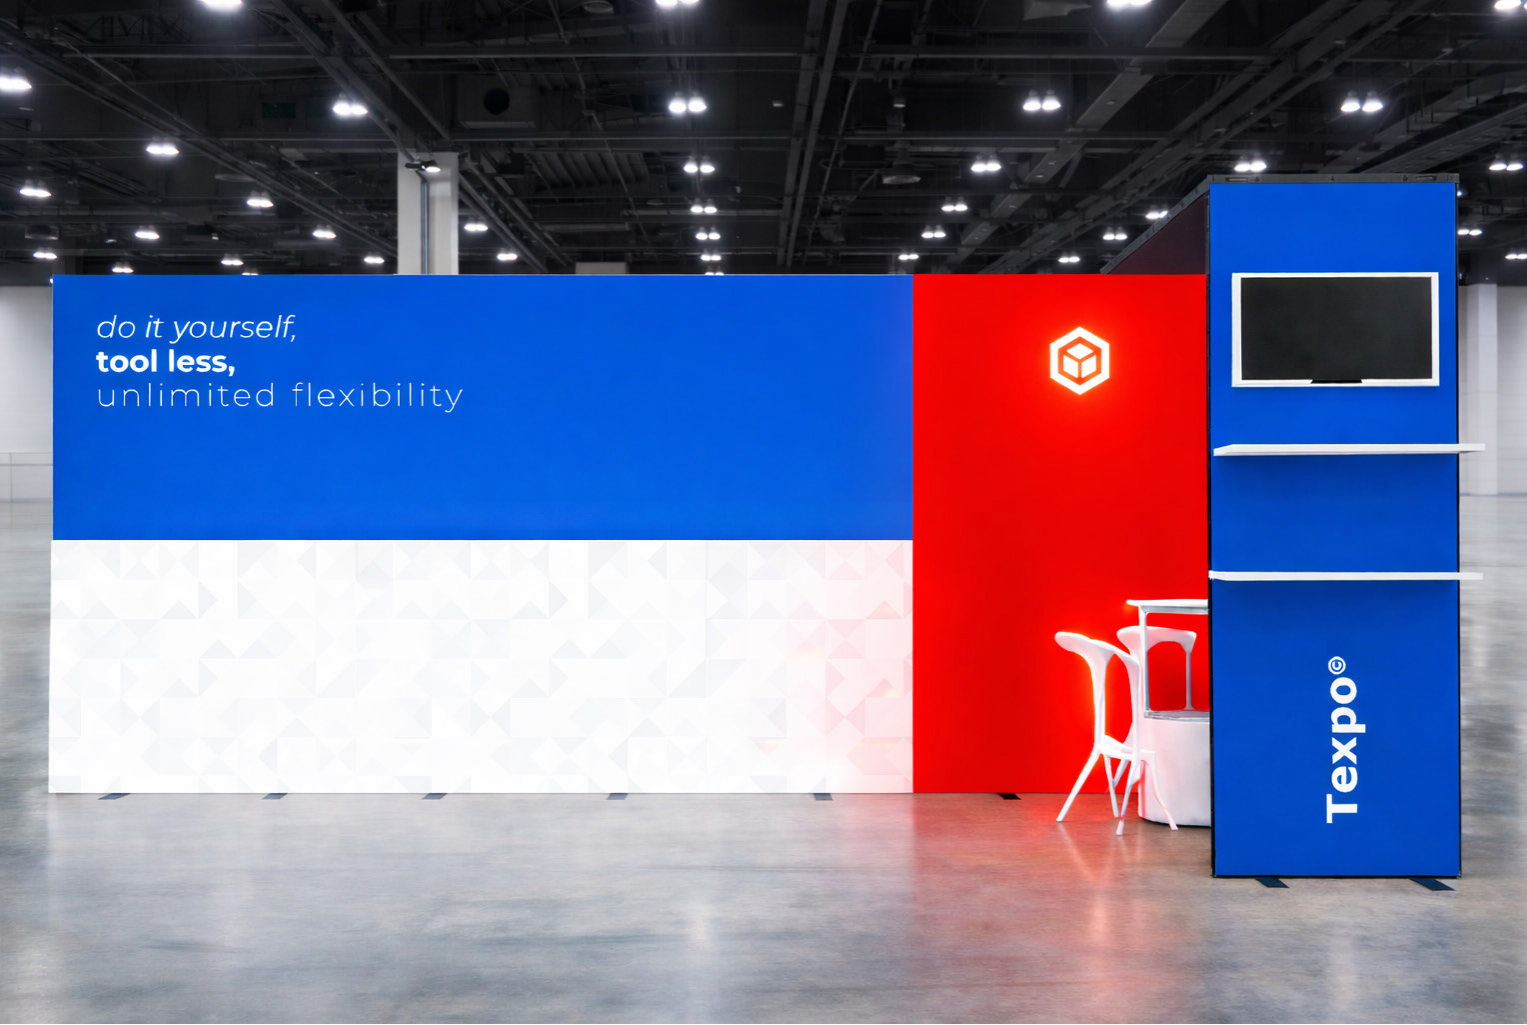

This straight stand layout features a full back wall that creates a strong visual backdrop for branding and product presentation. The open front space allows for easy interaction, while the integrated setup supports a clean and organized environment. Built with modular elements, it offers a practical solution that can be easily adapted to different exhibition needs.

straight
stand

This straight stand layout integrates backlit walls to create a bright and impactful visual display. The illuminated surfaces enhance graphics and branding, ensuring strong visibility across the exhibition space. Combined with a clean structure and modular elements, it offers a well-organized setup that is both functional and visually engaging.

This X shape stand layout uses multiple intersecting elements to create a structured and dynamic exhibition space. The arrangement allows for clear zoning between different areas while maintaining an open and accessible flow. Built with modular components, it offers flexibility in configuration while supporting a wellorganized and visually balanced setup.

stand
X shape

X shape
stand

This X shape stand layout creates a central structure with multiple open sides, allowing smooth circulation around the booth. The intersecting elements define distinct display areas while maintaining a cohesive overall design. An integrated storage room with a door provides a discreet space for materials and personal items. Built with modular components, it offers a flexible setup that supports both visibility and organized presentation.

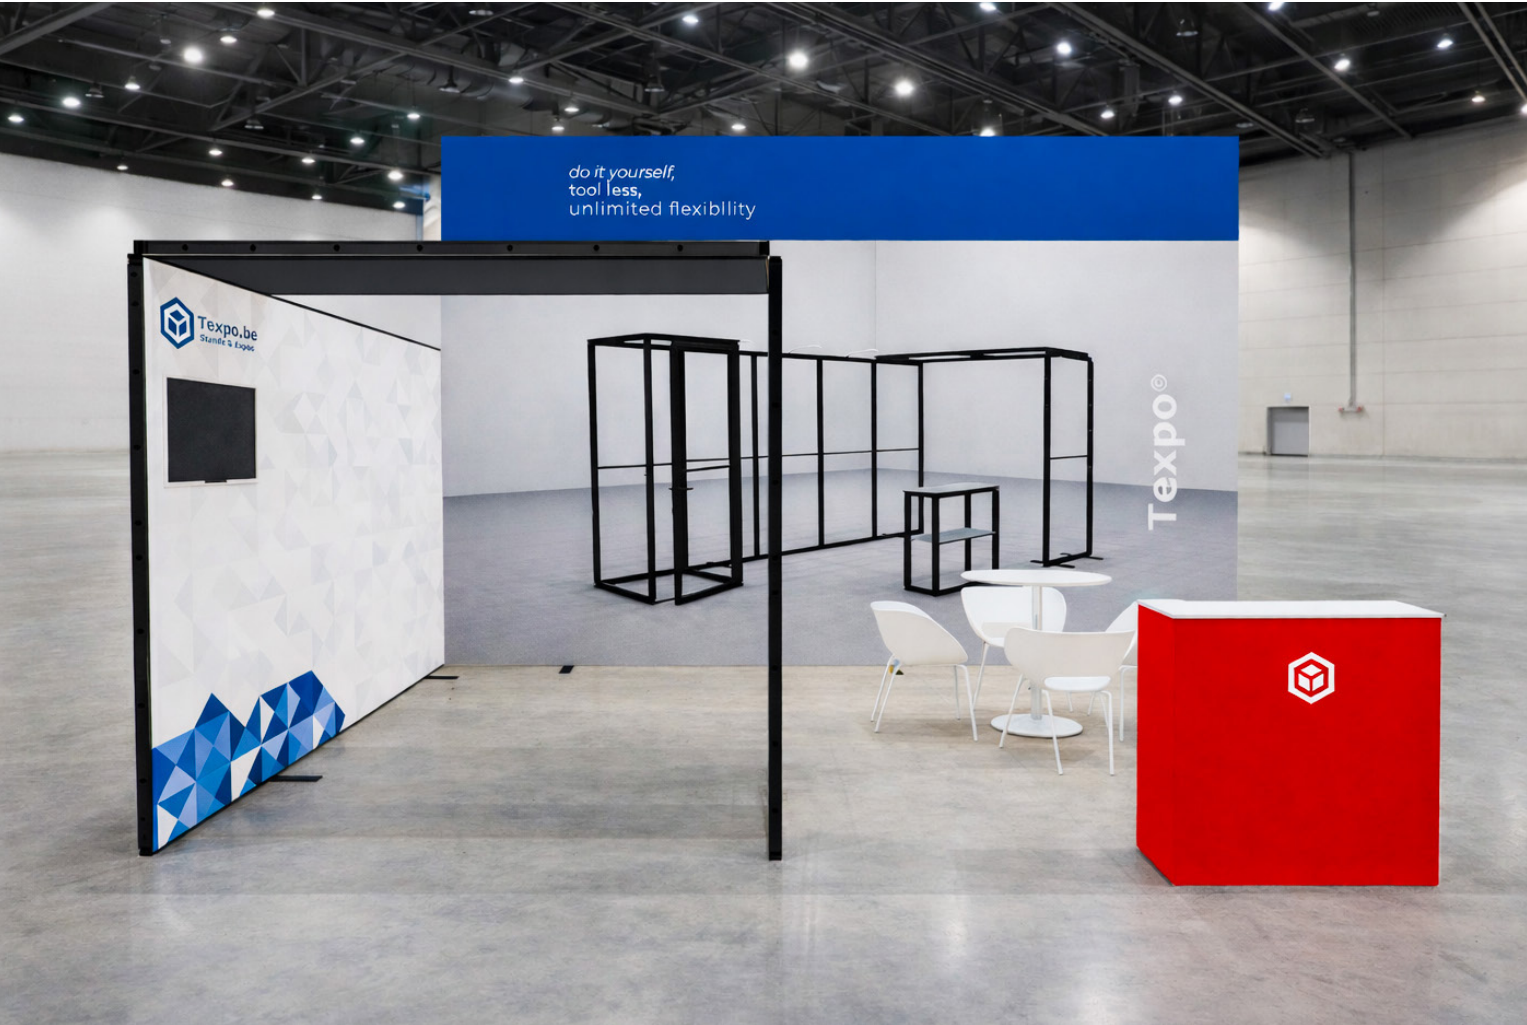

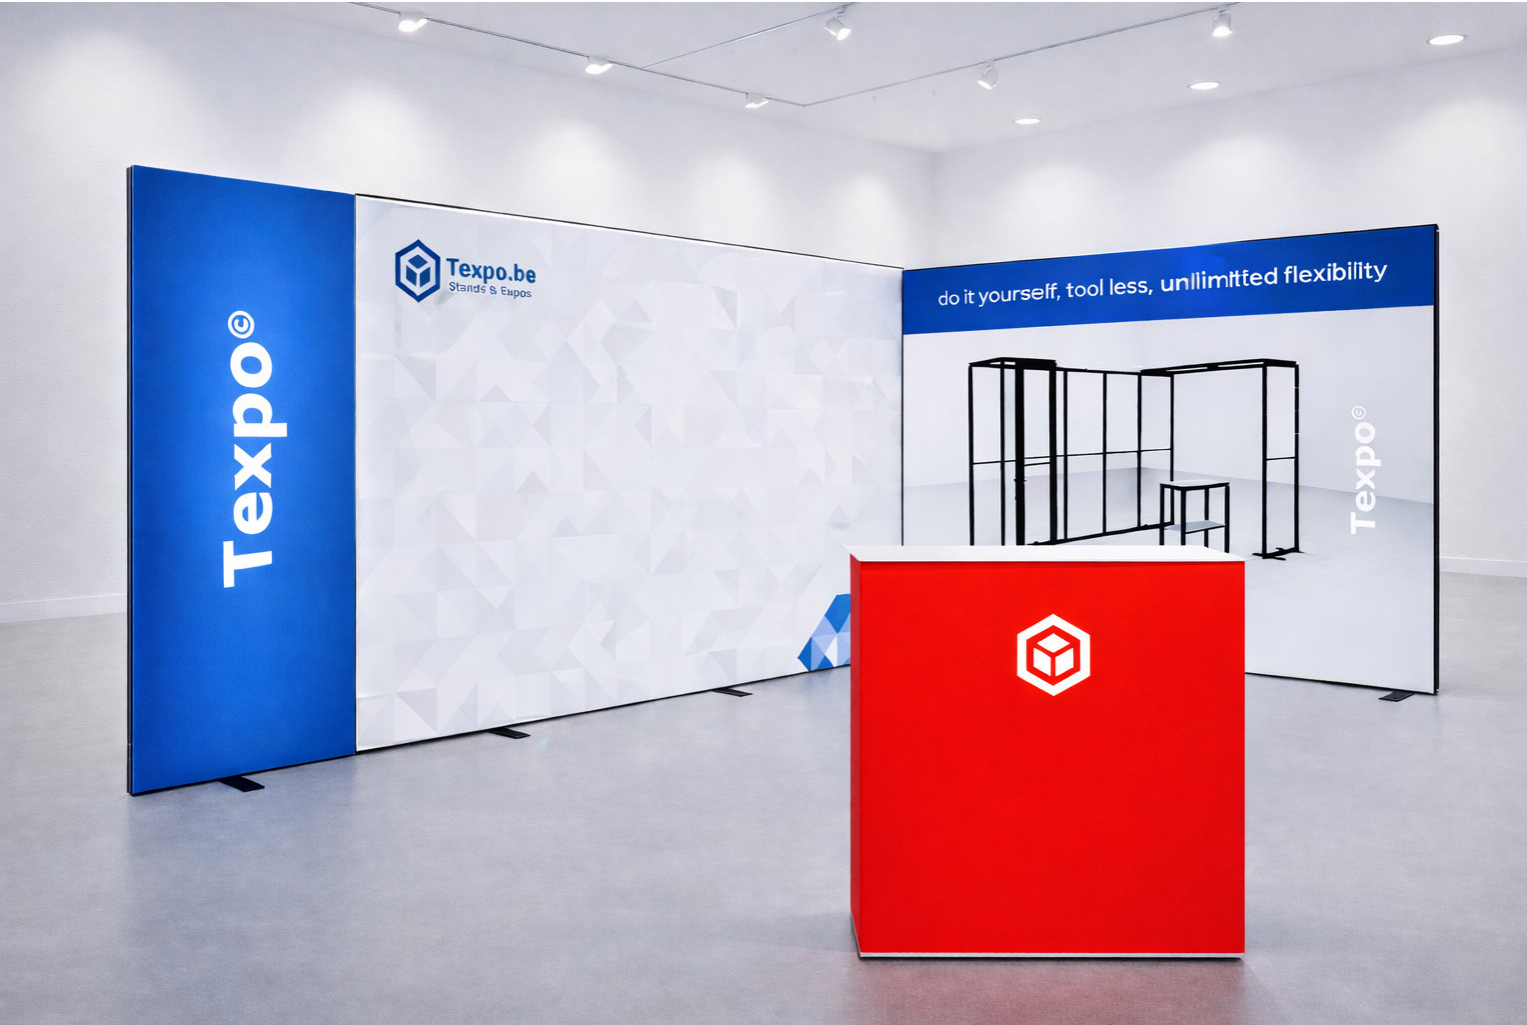

L shape stand

This L shape stand layout creates a natural flow between two connected display areas, guiding visitors through the space. The extended wall surfaces provide strong continuity for visuals, while the open side keeps the booth approachable. Its modular structure allows for easy adjustments to suit different layouts and presentation needs.

L shape stand

This L shape stand layout introduces a covered corner section that adds depth and structure to the space. The combination of open and defined areas supports both interaction and focused presentation. With its modular build, the setup can be reconfigured to suit different exhibition environments while maintaining a clear and consistent layout.

L shape
stand

This L shape stand layout uses extended wall surfaces to create a continuous visual flow across the booth. The angled configuration naturally frames the space, helping guide attention while keeping the setup open and approachable. Its modular system allows for easy reconfiguration, making it adaptable to different exhibition setups and branding needs.

stand
L shape

This L shape stand brings together two connecting walls to form a defined yet open display area. The layout creates a natural meeting point at the front, supported by a counter that serves as a central interaction space. The surrounding surfaces provide ample room for visuals, while the overall setup remains easy to adjust thanks to its modular design.

U shape stand

This U shape stand creates a defined display area with three connected walls, offering a focused environment for product presentation. Integrated shelving and display surfaces provide dedicated space to showcase products clearly, while the central screen supports additional visual content. The layout keeps everything organized and within reach, making it well-suited for structured and efficient presentations.

U shape stand

This U shape stand uses three surrounding walls to create a focused and immersive display area. The central backlit wall enhances graphics with a bright, high-impact visual effect, drawing attention to key messaging. The side panels frame the space, helping guide visitors inward while maintaining a clean and structured presentation. Its modular design allows for easy adaptation across different exhibition setups.

U shape stand

This U shape stand combines surrounding walls with illuminated vertical elements to create a visually engaging space. The central backlit wall enhances the main graphic, while the tall backlit panels on both sides add depth and strong vertical emphasis. Integrated shelving provides space for product display, and the open front keeps the booth accessible. The modular system allows the layout to be easily adapted while maintaining a consistent visual impact.
